ATT: MAYOR AND COUNCIL.

INFRASTRUCTURE MEETING.

I ride a mobility scooter and have problems with the infrastructure at the corner of Thames Rd. E. and No. 4 . It is not safe to get to Guardian Drugs, Independent grocers or Canadian Tire without having to cross Thames Rd. at Orchard St. going into traffic coming off and going onto the highway ,[B in blue] At the intersection north west corner the sidewalk only goes west or south not north or east.[on enclosed map it is marked in red with an A]. If the sidewalk is continued along east and add ramps into the parking lot then we [I am not the only scooter in town] would not have to be in traffic. [C in purple] I have come close to being hit because [D in orange] is the turning lane coming from the highway. Myself and the other scooter riders would appreciate the council looking into this situation before any accidents occur.
