

The Corporation of the Municipality of South Huron
Mayor George Finch & Members of Municipal Council
Attention: Rebekah Msuya-Collison, Clerk

Mr. Mayor and Councillors

Re: Mun # 9 Eva Street, Kingsmere North subdivision, Grand Bend

We are asking council to approve our installation of electrical power conduit and buried pressure fluid line for the transfer of waste from our property #9 Eva, a lake fronting lot to our vacant lot across the street. We are fortunate to have made it through this summer using strict "use protocol".

We have owned both properties for 32 years and lived in the area all our lives. It is our wish to use area on our vacant lot to install a high efficiency class4 distribution bed.

We have surveyed both lots and engaged Dave Morlock P Eng. of Flowspec Engineering Ltd. to do enough preliminary field work and proposal engineering to be confident of a successful solution.

We have asked for the depth location of the newly installed watermain upgrade to ensure the transfer piping would be below the water main as is good engineering practice.

Your consideration of this request that will permit the replacement of our bed and new installation of an effective and proven treatment system is appreciated.

Kindest Regards
