

Good Afternoon Mayor Finch,

I am writing in regards to the vacant lot after all the clean up of the old community center. After talking to a few of the residence we thought that planting grass seed, a few trees and picnic tables would make it like a park which the sign says [Centralia Community Park]. Parents that bring their kids to the playground could have a picnic and watch their kids play which would be a lot more convenient than using the pavilion. In regards to the ball diamond it is being used regularly as a dog park not only by Centralia residences but by Huron Park residences, and as long as everybody cleans up after their dogs it could still be used as a ball diamond during daylight hours. We think that this would be very cost efficient , lets try to keep it simple.
